

MANUFACTURER OF FORMULATED CHEMICALS FOR INDUSTRY

METAL FORMING
LUBRICANT TECHNOLOGIES

Technical Data Sheet

PRODUCT NAME: EZ FORM™ VO PLUS

DESCRIPTION

The EZ Form™ VO Plus is a mineral spirit based product, evaporating lubricant / coolant ideal for glass cutting and light to medium duty, painted and non-painted, multi-metal forming operations.

- Light-medium duty glass cutting / multi-metal forming and metal spinning
- Colourless, Odourless
- Contains Extreme Pressure / Anti-Spalling additives for added tool and work protection
- 90% Evaporation within 1 hour in open air
- Water soluble / rust inhibiting residue
- Approved by Formtek Group for use with WinPro, B&K, Yoder, Dahlstrom, FMI Dahlstrom, Engel Industries, Hill Engineering, Iowa Precision, Iowa Rebuilders, Lockformer, Elgin, Rowe, Lion Machinery, and Tishken equipment
- Especially effective as a lubricant for roll-forming pre-painted metals into window / door stiffeners and screen frames
- Does not affect most fully cured paints or plastic surfaces (spot testing is recommended)

Physical Data	
Composition	Liquid
Appearance	Clear
Odour	Bland
Specific Gravity	0.766
Flash Point	123°F (PMCC)

APPLICATION

EZ Form™ VO Plus is designed to be used as received. Application can be via spray, brush, dip, wipe, or roller. All surfaces coming into contact with EZ Form™ VO Plus should be cleaned of previously used lubricants in order to avoid cross contamination. Always start with thoroughly clean equipment, dies, and applicators.
